

2011-2012 Snow Plan

Bus Service during Winter Road Conditions

During severe winter driving conditions, the safety of Metro Transit's operators and its passengers is of the utmost importance.

In consultation with the RCMP, the Halifax Regional Police and HRM Public Works, the Snow Plan is designed to maintain service levels while minimizing disruptions by rerouting buses in areas consistently known to be troublesome during severe winter weather conditions. When the Snow Plan is put into operation, the following detours will be in effect:

Please note: *While the Snow Plan is in effect, accessible ramps on Accessible Low Floor (ALF) buses will not be deployed at Standard ALF bus stops or Non-Standard ALF bus stops until bus stops have been properly cleared due to safety concerns. Snow clearing at the bus stops in front of the Dartmouth Sportsplex next to the Bridge Terminal, and on Mumford Road at the Mumford Terminal are a higher priority and will be cleared within 24 hours.*
